

WHITEWATER®

Entertain the Possibilities

Creating the Perfect Park

AquaSphere + Tailspin + Rattler Fusion (Whirlin' Waters Adventure Waterpark, North Charleston, USA)

About WhiteWater

WhiteWater was born in 1980 with one clear purpose, to create places where families unite and make joyful lasting memories. Now over 40 years later, we are the world's largest provider of everything a water park needs, from park design to the broadest product range in the industry.

Local for Local

WhiteWater ERA GmbH is a wholly-owned subsidiary of WhiteWater, responsible for all contracts across Europe, Russia, and Africa. Recognizing the importance of having a local presence, we've expanded our Europe office and relocated to central Munich, Germany. This move ensures that our team, deeply rooted in the region, understands your market and is available within your time zone. While we offer the strength of global resources, our local team—fluent in multiple languages and backed by decades of industry experience—is uniquely positioned to deliver world-class water parks tailored to your needs.

WhiteWater's European Team

Our dedicated teams in Munich and Barcelona cover every aspect of our service, including Sales, Park Design, Marketing, Project Management, Operations, and Installation. By having these roles filled by experts within the region, we offer tailored support, immediate communication in your time zone, and deep market knowledge. This local presence, combined with our extensive global resources, allows us to deliver world-class water parks that meet your specific needs.

Tailspin + Boomerango Fusion (Farup Sommerland - Blokhus, Denmark)

Water Slides

RainFortress 5 (Aquapark Dalmatia - Sibeni, Croatia)

AquaPlay 750 (Aquapulco - Bad Schallerbach, Austria)

A water park essential, WhiteWater's multi-level immersive play structures provide all members of the family with a place to roam free and play at their own pace.

RainFortress 4 (Divertiland Water Park - Chianina, Romania)

Aquatic Play

FlowRider® Wave in a Box Double (Surf House - Ibiza, Spain)

FlowSurf™ Lake (Exo 38 - Tencin, France)

We have been building waves for over 30 years and have installed over 300 FlowRider® stationary surf simulators in nearly every corner of the globe. With over 14 categories to choose from, the newest addition to FlowRider's product line up is FlowSurf, a deep flow stationary wave using real surf boards.

For those looking for a larger option, Endless Surf is an in-land surf pool which creates perfect, powerful, and customizable waves for all abilities. Backed by a belief that everyone should discover the magic of surfing, Endless Surf is designed for operational ease, flexibility, high capacity, and above all else, safety.

FLOWRIDER® **FLOWSURF™** **ENDLESS SURF**

Endless Surf (O2 SURFTOWN MUC - Munich, Germany)

Surf
funs

Wave River (AquaSfera - Donetsk, Ukraine)

Wave Pool (Aquaboulevard - France)

Wave pools and rivers are the core of any water park, providing parks with solutions to expand their capacity and create areas where the whole family can play together. Our wave systems are energy efficient using 80% less power than industry competitors backed by innovative control and monitoring options.

Drive Your Business Through Guest Engagement

Exceptional guest experiences are driven by superior operations. Superior operations are powered by Vantage.

Vantage provides digital tools and solutions for operators to learn everything they need to know about their guests and tailor each experience before, during, and after the guest visit. This powerful, guest-centric platform encourages guests to engage with the venue and collects and correlates guest data for better decision-making and enhanced business success.

Your guests get:

- Tickets & Season Passes online purchase
- Online reservations & Cabana renting
- Cashless payment
- Safer rides
- Photos and Videos on the app
- Personalized experiences
- Park information (e.g. queue times)
- Family & Friends Finder
- Reward system (Points & Badges)
- Keyless lockers
- Premium Options

Your venue gets:

- Wearables, Mobile app and Kiosks
- Real-time analytics
- Easy-to-Use Dashboards & Actionable insights
- Informed decision-making
- Systems integration
- Ancillary revenue streams (e.g. personalized offers)
- Loyalty & Rewards program
- Minimized collisions risk.
- Staff empowerment & Access Control
- Employee activity tracking

LEADING PROJECTS IN THE REGION

LEGOLAND® Water Park at Gardaland Resort
 Castelnovo del Garda, Italy [www.](#)

“Place for the whole family. Do not miss if you are in holiday close by Garda Lake. One of the best in all of Europe.”

Hussein Al Radhwaan

Overview

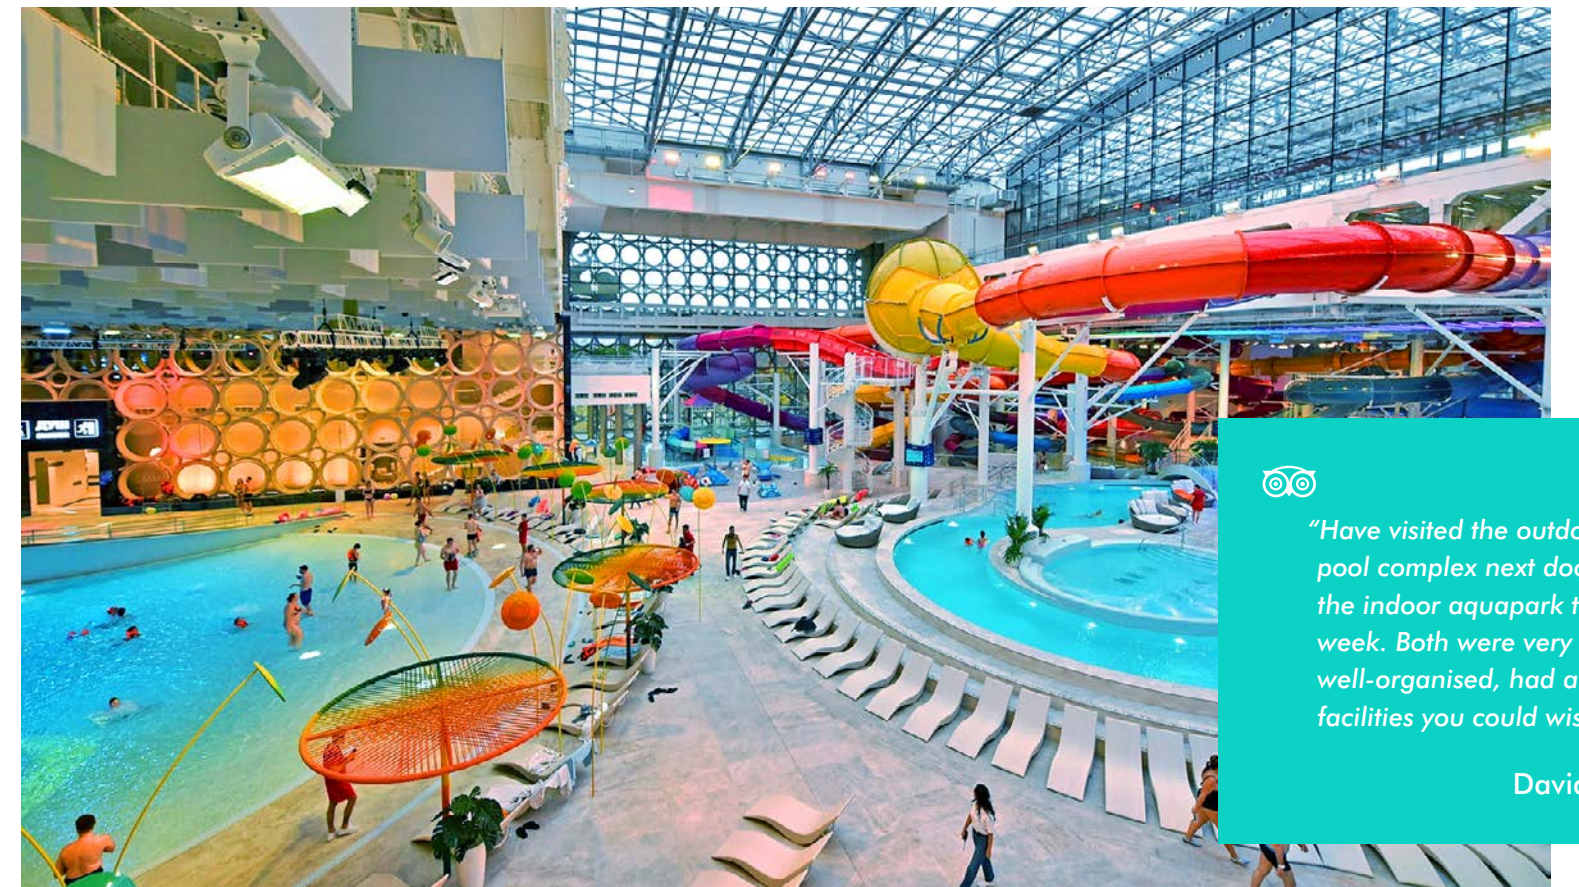

Slide Tower

RainFortress 5

Water Sports Palace Luzhniki
 Moscow, Russia [www.](#)

“Have visited the outdoor pool complex next door, and the indoor aquapark this week. Both were very clean, well-organised, had all the facilities you could wish for.”

David U.

Pool Sider

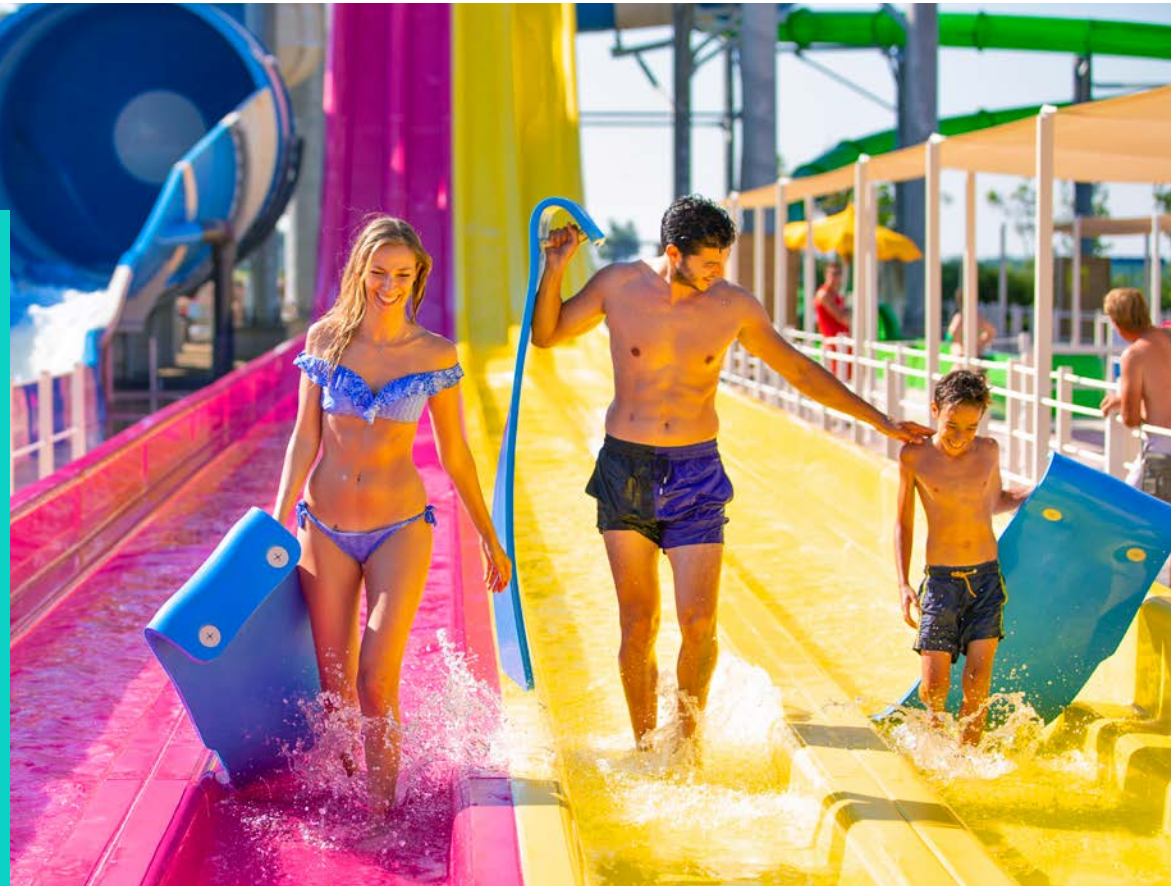

Mirabeach at Mirabilandia
Ravenna, Italy [www.](#)

"We had no doubt when it came time to decide how to improve Mirabilandia Beach. We wanted to add a worldclass slide complex to our ride mix, one that would be appealing to all of our guests, which is why we chose WhiteWater. We knew we could count on them to deliver safe, unique, and crowd-pleasing rides that would help us to increase our attendance and improve the quality of our offer. We are as thrilled with our new WhiteWater water slides."

Cruise Ships

With special considerations to be made due to deck space restrictions, WhiteWater has overcome typical cruise line water park challenges – such as UV exposure, sea water, and the ship’s swaying – while maximizing entertainment and minimizing build time.

[READ MORE!](#)

Municipal

Serving the needs of your entire community, municipal projects require specialists to advise on the optimal ride mix. WhiteWater’s in-house team of experts can design our signature water slides to fit your footprint, bringing you the same iconic water slides without the large water park expense.

Hotels & Resorts

Resorts need to look at ways to increase non-room revenue by providing a range of amenities that enhance the guest experience. Integrating indoor or outdoor water park attractions into your amenity allocation has shown to have a huge impact on the property's RevPAR.

Akvamir (Novosibirsk, Russia)

Indoor Water Parks

Indoor Water Parks can help companies beat the elements and escape short seasons. Attached to hotels, indoor water parks boost a property's ADR and occupancy rates.

Tricky recreational spaces that require expert planning and design to manage specific challenges, WhiteWater can help support facilities with:

SPACE & CAPACITY: Indoor water parks must be designed with the perfect balance between comfort and revenue driven capacity. With compact footprints, our ride path engineering team are experts at winding slides to maximize your space with the most thrills per inch while maintaining sightlines to minimize your lifeguarding costs.

HVAC & WATER QUALITY: Your choice of systems and equipment is crucial to your ongoing operating cost and longevity of your indoor park. Temperature control, air replacement, organic contamination and Chlorine corrosion are all factors which can be minimized.

Ride Mix: Selecting rides based on demographic is important to ensure that you are maximizing the entertainment value for the space available - including vertical space! WhiteWater thinks past the boundaries looking both to the roof and to the basement to help you create the best experience for guests as possible.

WhiteWater has extensive experience designing, engineering, and supplying from hundreds of indoor projects around the world that succeed in managing these unique challenges and deliver solid ROI.

Performance Services

Get the Most Out of Your Attraction with Performance Services

Maintaining a park is as critical as investing in one. At WhiteWater, we know downtime can result in loss in revenue and take a collaborative approach to help you build a long term maintenance plan to keep your attractions running like they did in the first year of operations. Our regional Performance Services team in Europe are here to help your attractions last for years to come.

Our team can support you with:

REFURBISHMENT AND RESURFACING

From gel coating, waxing, repairs to chips and cracks, water slide joint assessment and realignment, and more, our experts can help you with a performance assessment to make slides a smoother ride and keep them looking safe, shiny, and new for years to come.

RETROFITS AND ADDITIONS

Create a fresh attraction from an existing one—without the high price tag. Keep up to date with the changing trends and technology with our turnkey solutions whether this be installing AquaLucent to brighten up a water slide or adding Life Floor to make for a safer Aquatic Play structure.

PARTS AND REPLACEMENT

Always have what you need on hand to reduce ride closures. Find the parts you need by giving us a call for a consultation and receive the parts you need quickly from our regional warehouse.

TRAINING & EDUCATION

We can train your operators on how to take care of your attractions, what to look for in what frequency, what the common spare parts are, how to make adjustments, etc. and answer any questions you have specific to your equipment and operating conditions giving you your own one-on-one adviser.

Installation Supervision

Uncompromising Safety

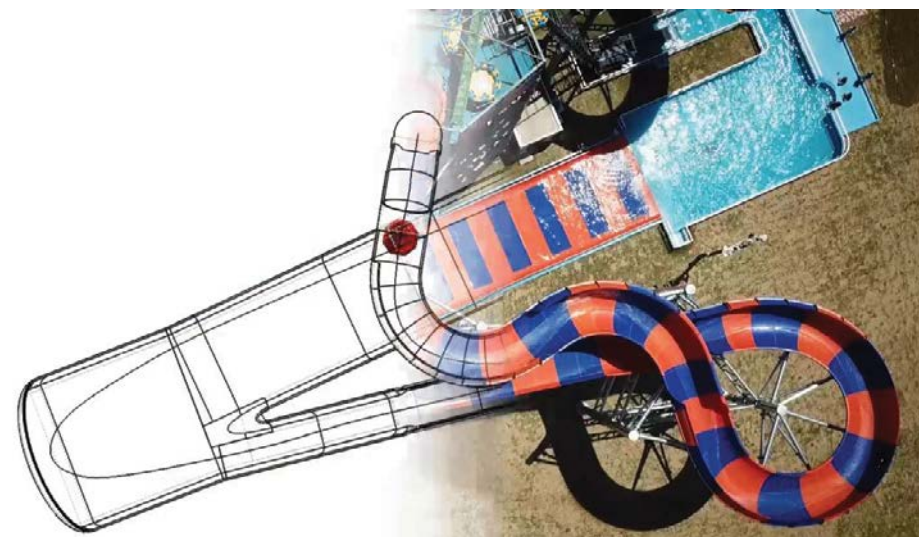

Safety is non-negotiable at WhiteWater. We are the only supplier who evaluates each design using carefully calibrated simulations followed by meticulous testing and fine-tuning to get the ride experience optimal and safety assured.

We demonstrate leadership in safety through our involvement with organizations such as ASTM International and IAAPA to support the standardization of international guidelines that govern the development of amusement rides and attractions worldwide.

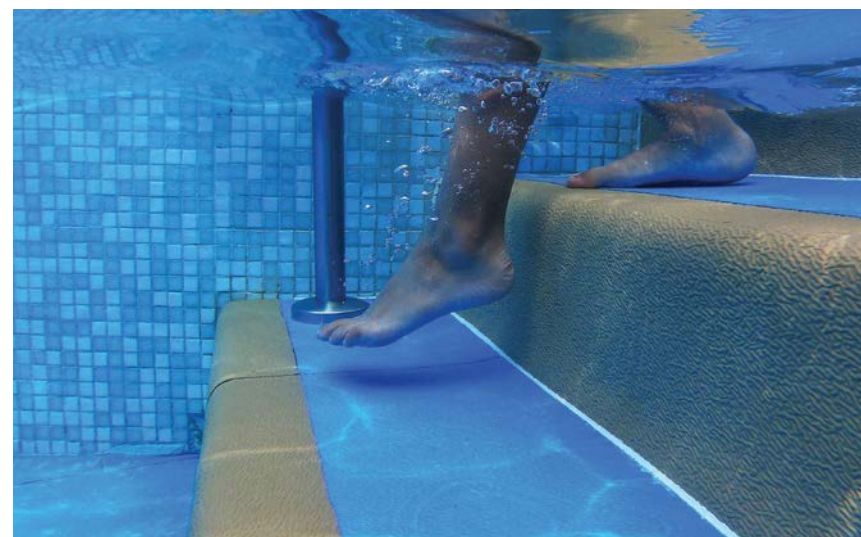

Quality That Lasts

Our products are designed to last even in the most challenging environments facing harsh elements like wind, UV, humidity, and chemicals. Our SilkTek™ fiberglass technology, made with a resin transfer moulding (RTM) process, ensures a smoother surface for a slicker sliding experience. Our inhouse centre of technical excellence tests our products to ensure what we provide is the most long lasting investment you can make.

Our quality doesn't end there, but extends to our steel manufacturing, theming, mechanical systems and more.

Safety Simulations

Life Floor

ASTM INTERNATIONAL

Master Blaster (Hangzhou Bay Sunac Cultural Tourism City - Haiyan, China)

A Focus on Sustainability

At WhiteWater, we've made significant progress towards our goal of achieving net zero by 2040, working across all areas of our business to reduce carbon emissions and waste. Our commitment to sustainability drives us to set industry benchmarks, and we've been investing heavily to ensure our products lead the way in environmental responsibility.

Here are some of the ways we prioritize water and energy efficiency:

LOW WATER ENTRY TUBS

All of our vehicle water slides have an innovative entry tub design that requires less water at the start (while still allowing for self-dispatch) which means that the slide uses less water overall.

PROPRIETARY SIMULATIONS

As guests ride down one of our family raft rides, they will thrill in the higher climbs around turns on our pioneering risers, designed using proprietary simulation tools.

MINIMAL SPLASH RISERS

Different riser types are deployed to not only ensure maximum water splash-out containment, but to also provide guests with an even more exhilarating ride.

WAVE CATCHER RUN-OUT LANES

For vehicle slides that terminate in run-out lanes, we also provide patent-pending to patented lane terminations to contain wave splash over and provide guests with safe and convenient exit points.

We Bring Local Knowledge and Global Expertise

The WhiteWater ERA GmbH team is perfectly positioned to be the local provider for clients interested in developing a wide range of projects, while providing our clients with a global network of experts in safety, design and operations.

Leveraging our local expertise to bring your vision to life and meet your needs efficiently, we also offer the global reach to reduce costs while providing dedicated support across the entire ERA region.

Give us a call to start learning about how to build an award-worthy project of your own.
