

Mini Blaster

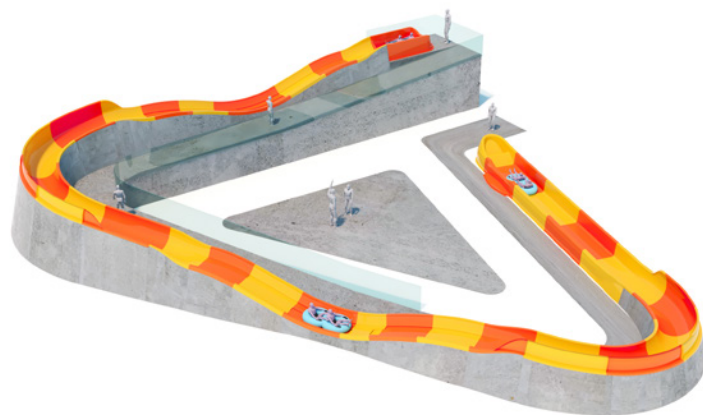

Introductory Thrills for Your Most Important Guests

We have taken our industry-leading water coaster, Master Blaster, and made a kids' version with scaled down drops and uphill blasts to give your littlest guests a fun and safe water slide experience.

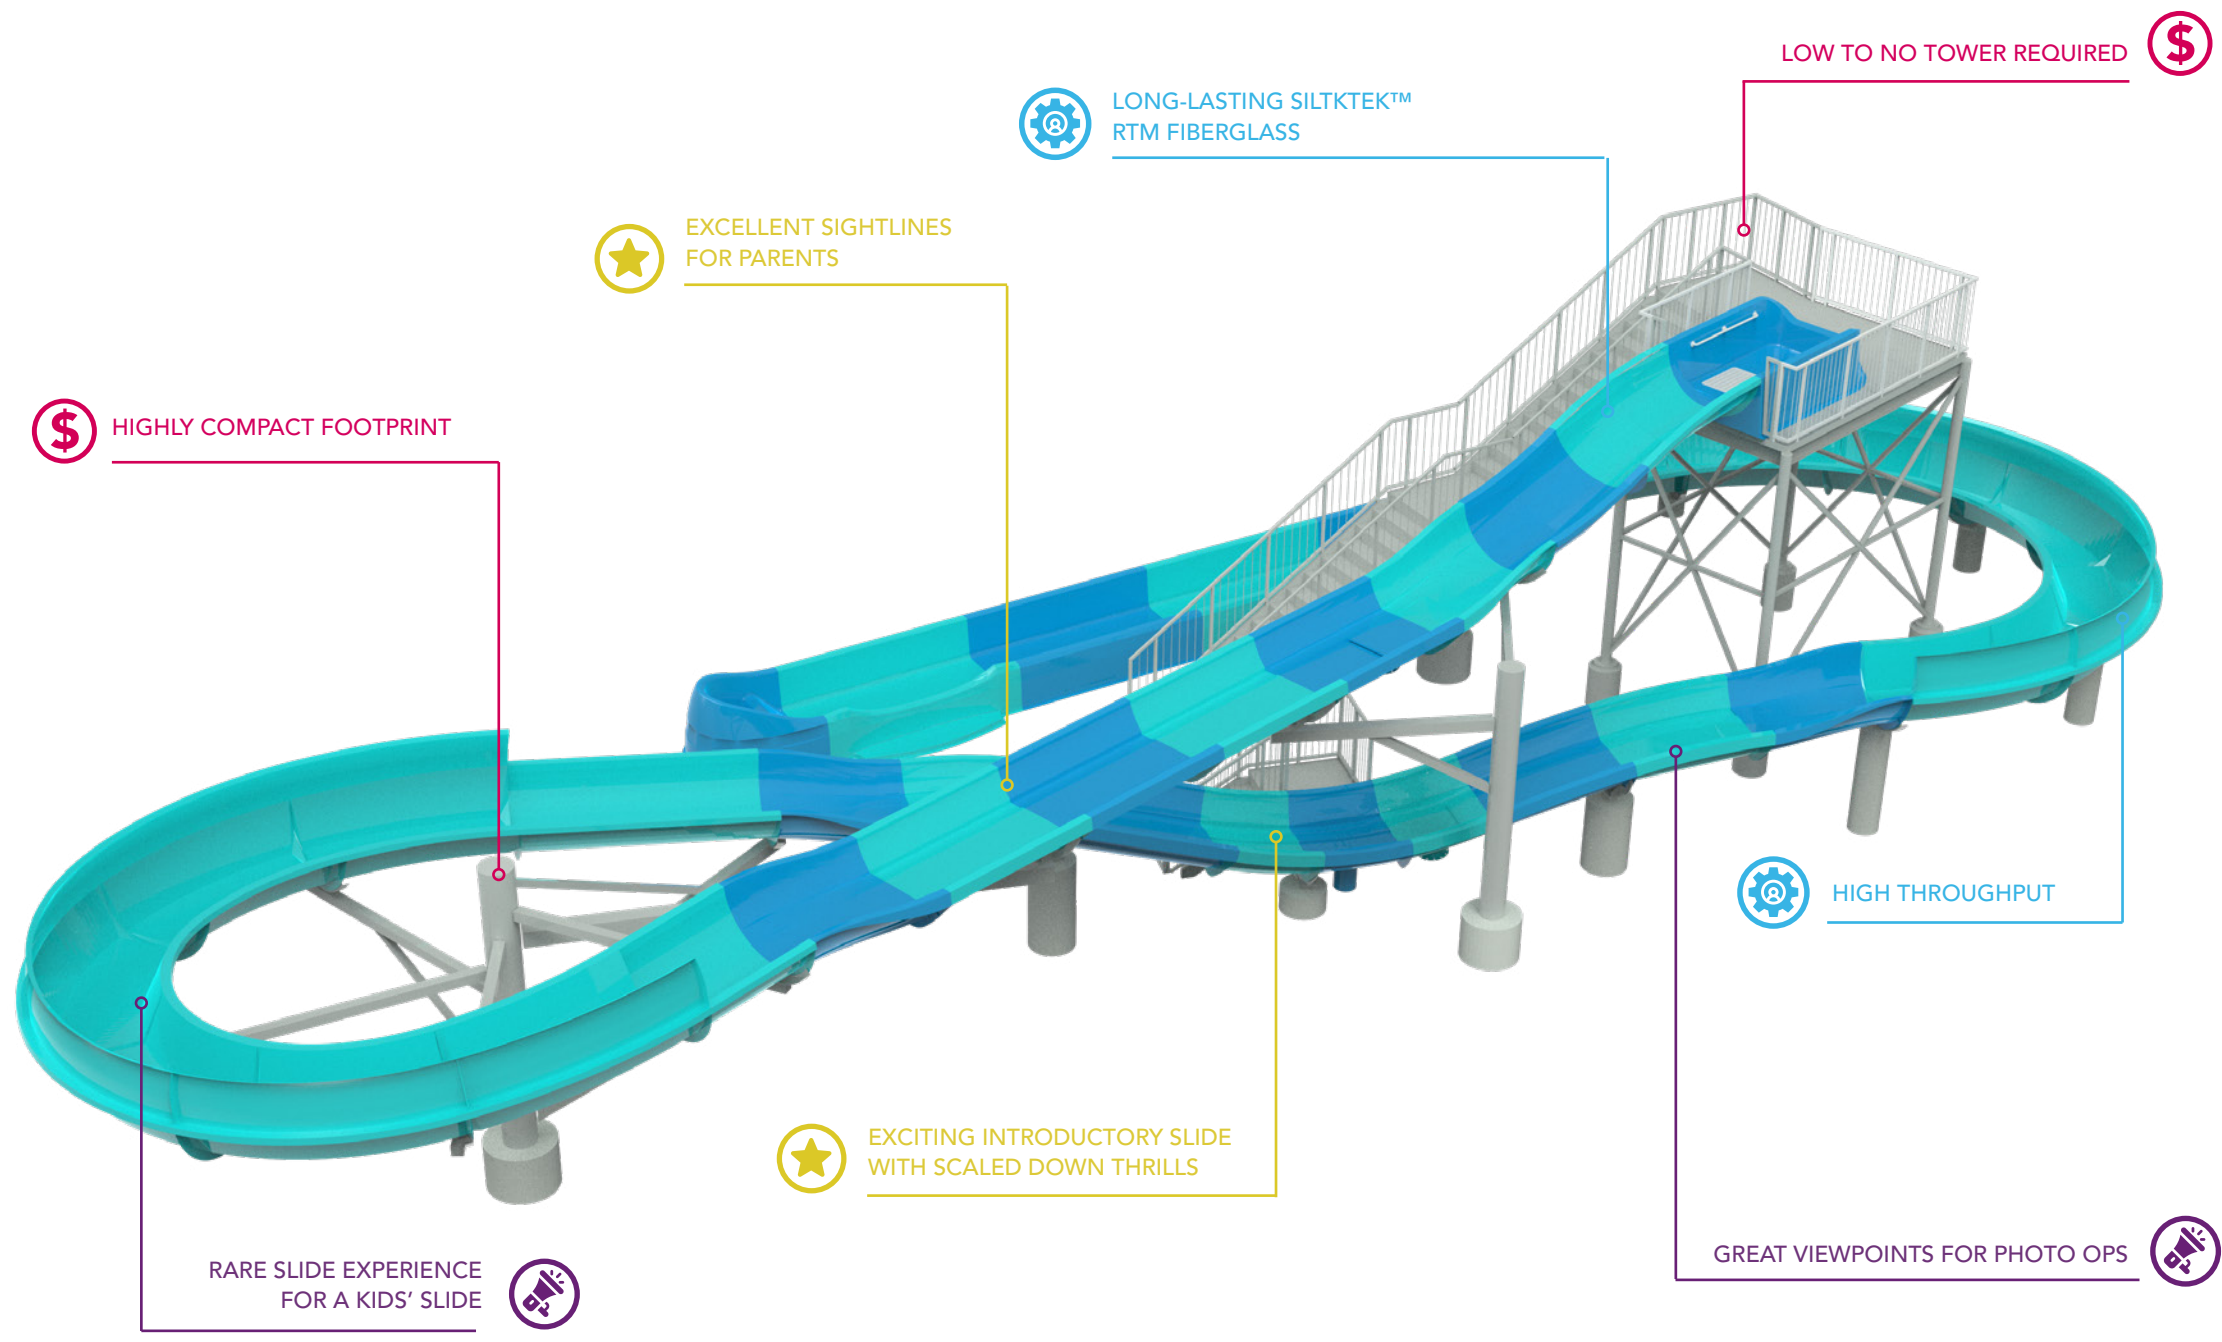

MAIN FEATURES:

Vehicle: Kids' inner tube

Audience: Kids

WHITEWATER[®]

FOR YOUR GUESTS

Mini Blaster's increased speed and thrill level, when compared with other kids' slides, offers your littlest guests a new and unique ride experience, while introducing them to the excitement of larger slides—in preparation for graduating to the adult slides.

FOR YOUR MARKETING

A rare sight in parks, the photo op of little kids laughing on an uphill blast will differentiate your kids' area from the rest and signal to your guests that every member of the family will have a fun day out.

FOR YOUR OPERATORS

High throughput, clear sight lines, Smart Blast technology, and RTM fiberglass ensure Mini Blaster is easy to operate, energy and water efficient, and straightforward to maintain.

FOR YOUR BOTTOM LINE

In addition to improving your parks' kids' offering, which will increase your customer base, Mini Blaster can be configured to fit your budget and footprint. The slide can be designed with a low, or no, tower and its slide path can be designed to fit in or around space constraints.
